

Bring Truth to Fear

www.bringtruthtofear.org

Long-Term Vision

People who previously held widely different opinions engage in regular discussion about how to understand & address shared concerns & improve our world

There are systems that provide reliable and verifiable information on issues and opportunities and incentives for people to work together to respond to them.

There is a shift of emphasis from the American Dream (individual and materialistic) to The American Potential (what we can accomplish by realizing our personal gifts and working together to improve our lives)

The use of fear and misleading information lose effectiveness as political tactics

There is increasing recognition that the greatest threats to health, safety & sustainability are the result of exclusion and isolation

There is increasing realization that the common good is best served when we support each person in recognizing and realizing their gifts and potential

We work together to create a sustainable future that recognizes the value and dignity of all life

How To Get There

Develop tools and resources to help people recognize and confront the effects of Fear-Based Thinking and misleading information

Develop and fine-tune a simple process to facilitate meaningful conversations about shared interests among people who previously held widely divergent views

Create an organization & recruit artists & programmers to develop apps, articles, videos, stories, games, songs etc, to spread the word and get adults and children involved

Provide resources that help people choose & evaluate news and political messages and ask questions that lead to a greater understanding of issues and concerns

Develop a system to support and track the process of finding reliable information on relevant topics & exploring & sharing ideas

Develop & fine-tune systems that encourage and support people to work together to respond to problems and opportunities at all levels
